(6) ALUMINUM SPACERS

(6) 10MM STEEL INSERT BUSHINGS

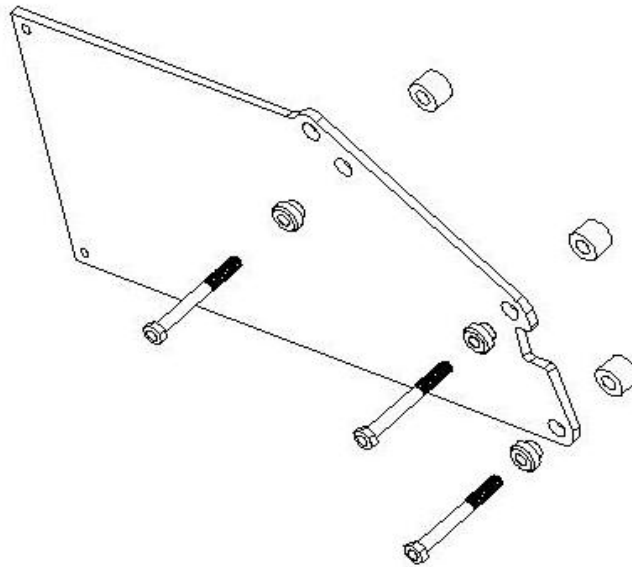

(6) 10MM X 1.25 X 75MM HEX HEAD CAP SCREWS

(1) ENGINE PLATE, RIGHT.

(6) 8MM STEEL INSERT BUSHINGS

(6) 8MM X 1.5 X 75MM HEX HEAD CAP SCREWS

The Competition Engineering Motor Plate Kits are intended for use on Ford Modular engines with 2, 3 and, 4 valve heads. The kits can also be used on both 4.6 and 5.4 motors. By using the various insert bushings, cap screws and spacers supplied, the plates can be installed on a wide variety of Modular Engines produced through the years. The motor plates are designed as a trim-to-fit installation, best accomplished during the chassis construction phase.

The illustration above shows a typical assembly. Your application may vary.
