

Street Performance Small Blocks

Dart Machinery, Troy, Mich., presents its SHP PRO small block, designed to fill the need for an affordable, precision-machined cast iron block for Sportsman racing and street performance use. The SHP PRO is fitted with billet steel 4-bolt caps on all five main bearings, secured with ARP studs for added strength. The cam bore has been upgraded to BBC size to enable use of larger-base circle cam cores, and the lifter bores are upgraded to 0.904 inches. The modifications enhance high-rpm capability by stabilizing the valve train and crankshaft.

Mustang Coolant Expansion Tank

Moroso Performance Products, Guilford, Conn., presents its Coolant Expansion Tank for 2011-up Ford Mustangs. The direct bolt-in replacement for the stock two-piece plastic tank, it is made of aluminum for strength and to withstand repeated high-heat situations. The tank can be polished, chromed, painted, powder-coated or left as-is for a race look. It uses the factory stock vented cap and bleeds pressure like the factory intended. Features include integral billet aluminum hose fittings.

Mustang Automatic Aluminum Radiator

Mishimoto, Wilmington, Del., introduces an aluminum radiator designed for 1979-'93 Ford Mustangs with automatic transmissions. The performance aluminum radiator increases cooling capacity up to 30 percent due to a larger core to help protect daily drivers or track cars from overheating. The Mishimoto Ford Mustang radiator is constructed using a lightweight two-row core made of 100-percent brazed aluminum and TIG welded polished end tanks. No cutting or additional modifications are required.

2011 Mustang Clutches

Centerforce, Prescott, Ariz., presents its Dual Friction and DFX series clutches, including applications for 2011 Ford Mustang 5.0-liter, 32-valve, 6-speed manual models. Each of the two new clutch assemblies replaces the current assembly with a higher holding capacity pressure plate, designed for a direct bolt-in replacement. The DFX clutch assembly requires a Centerforce flywheel. The Dual Friction pressure plates offer street characteristics while featuring improved holding capacity and durability. The DFX is the company's latest single-disc performance clutch.
